**TERRECO**  
RESOURCES

We offer a selection of quality selection of Sand & Gravel Quarry products that are extracted on site, then processed through our own Crushing & Washing Plant to ensure consistent, clean, quality-controlled materials.

## CLEAN CLAY FILL

Due to its compactness and low permeability clay fill can be used as foundations support and erosion control.

## WASHED COARSE SAND

Used for leveling and creating stable foundations. A bedding material for laying pipes or as a base for concrete slabs.

## WASHED HORSE ARENA SAND

A coarse sand suitable for lunging rings, arenas and tracks.

## WASHED FINE SAND

A free draining sand which can be used for concrete mix, tiling, under paving or as lawn dressing.

## 10MM CRUSHED SANDSTONE

Crushed sandstone decorative gravel for gardens or driveways.

## 20MM CRUSHED SANDSTONE

20 mm decorative gravel with a mix of light earthen tones.

## 40-60MM CRUSHED SANDSTONE

Decorative gravel suitable for garden projects.

## 10MM ROAD BASE

10 mm road base ideal for path ways, small drive ways and shed floors. Packs down hard and has a nice light creamy finish.

## 20MM ROAD BASE

20mm road base suitable for shed floors and rural drive ways.
